

## LONG ASSAULT CLIMBING HOOK (7 INCH)

The Cadex Long Assault Climbing Hook (LACH) provides assaulters with an extremely versatile tool for vertical Method of Entry.

It is designed to be used with pole systems such as any after market pole to emplace and securely fix assault ladders in place on the wide variety of surfaces typically encountered on operations. In addition the LACH can be employed with or without carabiners, be hand emplaced and used to secure ropes for multiple mobility scenarios, ascending or descending.

Designed to stand up to the toughest use, the LACH's light weight body is constructed from 6061-T6 Aluminum, with all critical hardware made of corrosion resistant steel. To ensure the LACH stays fixed when it is emplaced, it uses sharp carbide spikes, which are extremely resistant to wear or breakage.

Tactical Team Operators require an assault hook that is compact and easy to carry in a host of load carriage systems; the 7 inch LACH opens to 90 degrees for use, yet when folded will easily fit in a pouch.

The LACH is designed and manufactured in Canada to provide personnel with a robust tool for their assault team gear.

Pole holder not included

### Specifications

Material : Frame 6061-T6 Aluminum  
Spikes Carbide

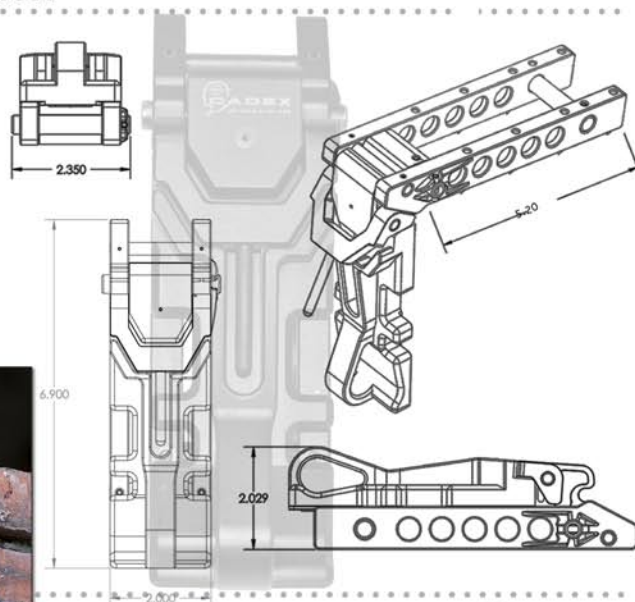

Weight : 497 grams 17.5 ounces

Opening angle : 83 degrees

Colors : Black anodized

Static Hook Capacity : 1300 pounds
