

HAND STOP

The Cadex Hand Stop provides the operator with a device that enhances safe handling of short barreled weapons by preventing the lead hand from moving forward of the muzzle. It also optimizes weapon control and accuracy by providing a tactile indicator of hand position, which permits a repeatable weapon hold. It is adaptable to both Mil Std 1913 and Weaver rails.

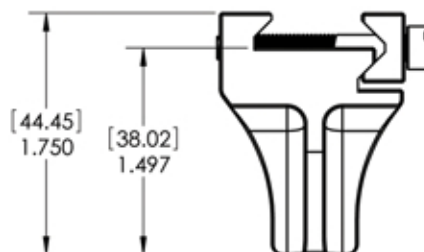

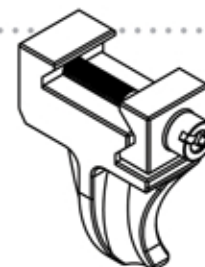

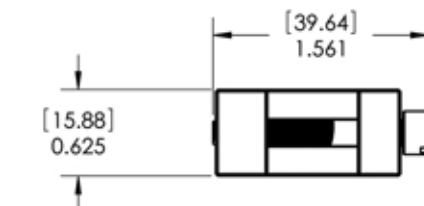

As a shooting aid during automatic fire, the Cadex Hand Stop assists positive retention of the weapon for maximum muzzle control during rapid fire. On a shotgun, it permits positive control of the pump. Used for conventional forward holds, it can provide the shooter with a low-profile, lightweight marksman hand stop.

Specifications

Material	: Aluminum
Weight	: 38 grams / 1.3 ounces
Interfaces	: Fits both M1913 and weaver rails
Colors	: Anodized Black
