

FOLDING VERTICAL GRIP

The Cadex Folding Vertical Grip provides the operator with a weapon hold that is adaptable to changing tactical conditions. It is adaptable to both Mil Std 1913 and Weaver rails.

Operation of the Cadex Vertical Grip is easy for left or right handed operators. The centrally located grip release button is pressed with the thumb to either fold or extend the grip.

In the vertical position, the grip reduces target acquisition time and provides positive retention of the weapon for maximum muzzle control during rapid fire. Folded, the grip permits a conventional forward hand-hold and with the lower profile of the folded grip, the weapon can be rapidly maneuvered to be fired over cover.

The grip features rattle proof storage for 2 X CR123 batteries. The self draining battery compartment is accessed by twisting and pulling; it remains captive to the grip so that it can not be lost.

This grip is designed and manufactured in Canada, providing Canadian and international operators a viable weapon grip solution.

BENEFITS OF THE VERTICAL GRIP

- Mounts to MIL - STD 1913 rails and Weaver rails
- Holds 2 x 123 lithium batteries
- Reduces target acquisition time
- Adaptable to both Mil std and Weaver rails
- Maximum muzzle control during rapid fire
- Available in black and olive drab

VERTICAL GRIP

Specifications

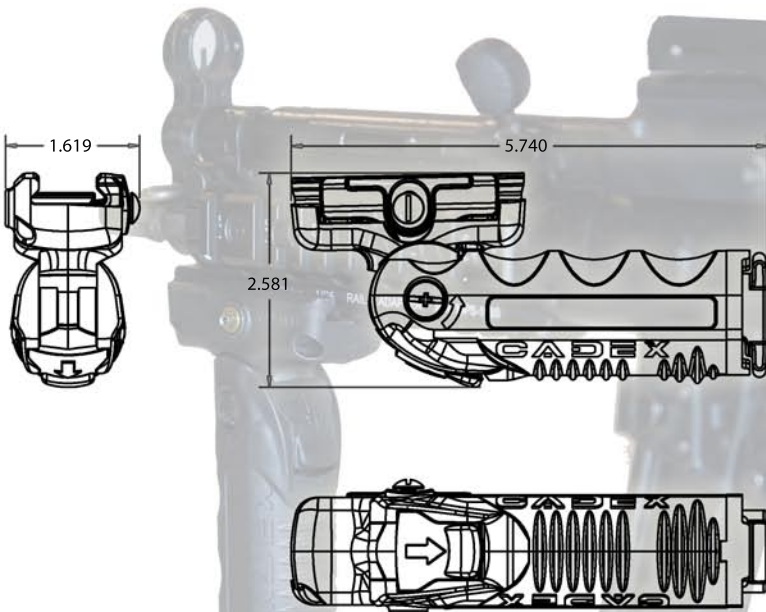

Material: Nylon

Weight : 123.8 grams / 4,4 ounces

Interfaces : Fits both M1913 and Weaver rails

Colors : Black, OD, Foliage, Tan
