

# CADDEX

## REM 870 MODULAR TACTICAL/ BREACHING SHOTGUN KIT.

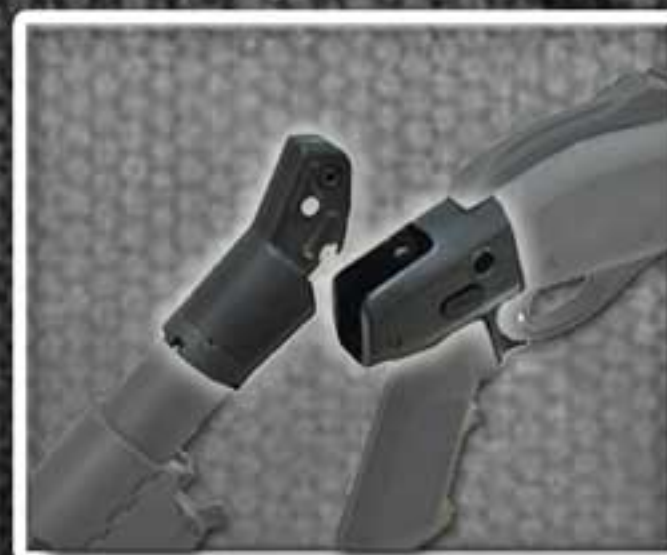

### REM 870 TOP RAIL

- The NATO / Mil M1913 Standard rails permit the mounting of holographic optics, giving the shooter quicker, more accurate engagements.
- Forward side rails allow the user to mount white light or IR lights, Cadex Sling Mounts and Glass Punch.

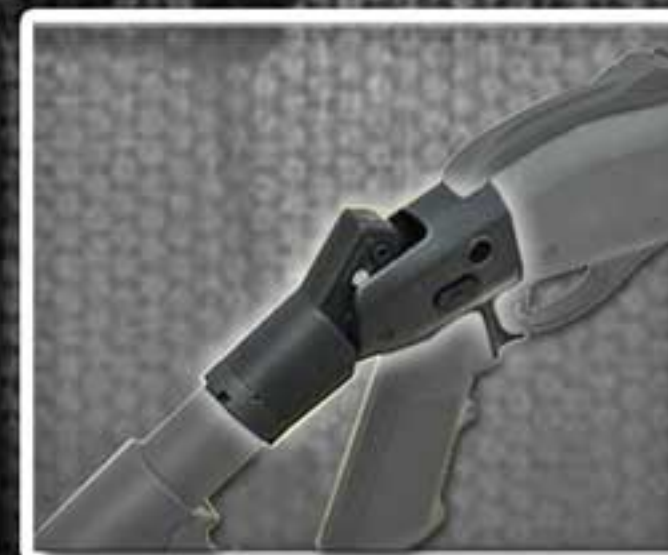

### REM 870 BUTT ADAPTOR

- Allows the user to configure between tactical and breaching shotgun, adjust to allow for body armor & tac vest compatibility.
- Positive engagement ensures rugged reliability, recessed QD detach button allows for quick configuration.

## REM 870 MODULAR FOREND RAIL SYSTEM

User and mission requirement dictate the need for quick and easy changes to a weapon system. None more so than a shotgun. New to the Cadex product line is the modular forend rail system. **Operator configuration to mission requirement!**

A lightweight solid body secures to the factory forend, but allows different length rails to be fitted. This in turn allows the user to fit his or her choice of white light, IR light, sling mounts or even the Cadex glass punch.
